

LAZYAR AZAD
CIVIL ENGINEER

CONTACT

- +964 770 138 7187
- lazyarazad65@gmail.com
- Sulaymaniyah, Iraq

TECHNICAL SKILLS

- Autodesk AutoCAD — Very Good
- Autodesk Revit — Very Good
- Autodesk Civil 3D — Good
- CSI ETABS — Very Good
- CSI SAFE — Very Good
- Microsoft Excel — Very Good
- Microsoft Word — Very Good

SITE SKILLS

- Materials Estimation
- Leveling
- Attention to Detail
- Problem Solving
- Teamwork
- Adaptability
- Communication

LANGUAGES

- Kurdish — Native
- English — Very Good
- Arabic — Moderate

PROFILE

Civil Engineer with practical experience in site supervision, construction coordination, quantity estimation, shop drawings, and quality checking. Experienced in coordinating civil, mechanical, electrical, finishing, and smart-building works, with strong skills in engineering software and on-site problem solving.

PROFESSIONAL EXPERIENCE

ARAM CITY COMPANY — PROJECT SUPERVISOR / CIVIL ENGINEER

Aug 2024 - Present | Sulaymaniyah, Iraq

- Supervise projects from start to finish, coordinating site teams and contractors.
- Prepare Bills of Quantity (BOQ), material requests, estimations, payment documentation, and final reports.
- Supervise concrete works and verify reinforcement before casting; prepare reinforcement shop drawings.
- Coordinate finishing works including block work, cement plastering, gypsum, tiles, screed, carpentry, carpet, and ceiling works.
- Supervise mechanical systems including HRV, ductwork, piping and plumbing, VRF, and fire-fighting systems.
- Supervise electrical works including boxes, sockets, lighting, wires, cable trays, and smart-building systems.

ENERGY TRANSITION COMPANY — ENGINEERING PROJECT ASSISTANT

Jun 2023 - Nov 2023 | Sulaymaniyah, Iraq

- Surveyed and staked out road points and assisted with construction layout.
- Prepared estimates for various construction jobs.
- Created and leveled drainage and manholes.
- Prepared surfaces through cutting and filling for subsequent construction stages.

ALTTWN 2 COMMERCIAL BUILDING — CIVIL ENGINEERING ADVISER

Jun 2022 - Nov 2022 | Sulaymaniyah, Iraq

- Supervised concrete works and checked reinforcement before concrete casting.
- Prepared concrete and reinforcement estimates.
- Created reinforcement shop drawings.

EDUCATION

B.Sc. in Civil Engineering

University of Halabja | 2020 - 2024

Final grade: 85.792% (Very Good) | 240 ECTS

Thesis: Shear Strength and Behavior of Strap Fiber Reinforced Concrete Beams with Basalt FRP Bars

HONOURS & AWARDS

1st Place — Civil Engineering Competition, University of Halabja (2023-2024)

Awarded for a model focused on generating electricity using heat and light from landfill waste.

3rd Place — Civil Engineering Competition, Tishk International University (2022-2023)

Awarded for a smart building block concept designed to be lightweight, economical, environmentally friendly, and usable without mortar.

1st Place — Civil Engineering Competition, University of Halabja (2021-2022)

Awarded for a shimmer gypsum concept creating a wall that could glow in the dark.

CERTIFICATIONS & TRAINING

- 01 Revit Structure — BIM Space
- 02 Revit Structure — Brilliant Engineering
- 03 RC Building Design — Brilliant Engineering
- 04 Foundation Design — Brilliant Engineering
- 05 Seismic Design by ETABS & SAFE — BIM Space
- 06 IREX Internship — Central Park
- 07 IREX Internship — Aram Intersection
- 08 Green House — BREEAM Academy
- 09 Soft Skills & Communication — Kaizen Consultancy

SELECTED PUBLICATIONS

2026
Behavior and shear strength of FRC beams with FRP bars: state-of-the-art review, comparative analysis, experimental and numerical validations
Innovative Infrastructure Solutions — Springer Nature

2025
Experimental and numerical assessment of recycled plastic fibers on shear strength and behavior of reinforced concrete beams with basalt FRP bars
Engineering Structures — Elsevier

2024
Shear strength and behavior of recycled plastic strap fiber reinforced concrete beams with basalt fiber reinforced polymer bars: an experimental and analytical study
Innovative Infrastructure Solutions — Springer Nature

2024
Predicting shear strength of fiber-reinforced concrete beams reinforced with longitudinal FRP bars with machine learning techniques
Australian Journal of Structural Engineering — Taylor & Francis

ADDITIONAL STRENGTHS

- Project coordination and site supervision
- Quantity take-off, BOQ preparation, and material estimation
- Shop drawings and reinforcement detailing
- Reporting, documentation, and time management
- Cross-functional teamwork and communication
